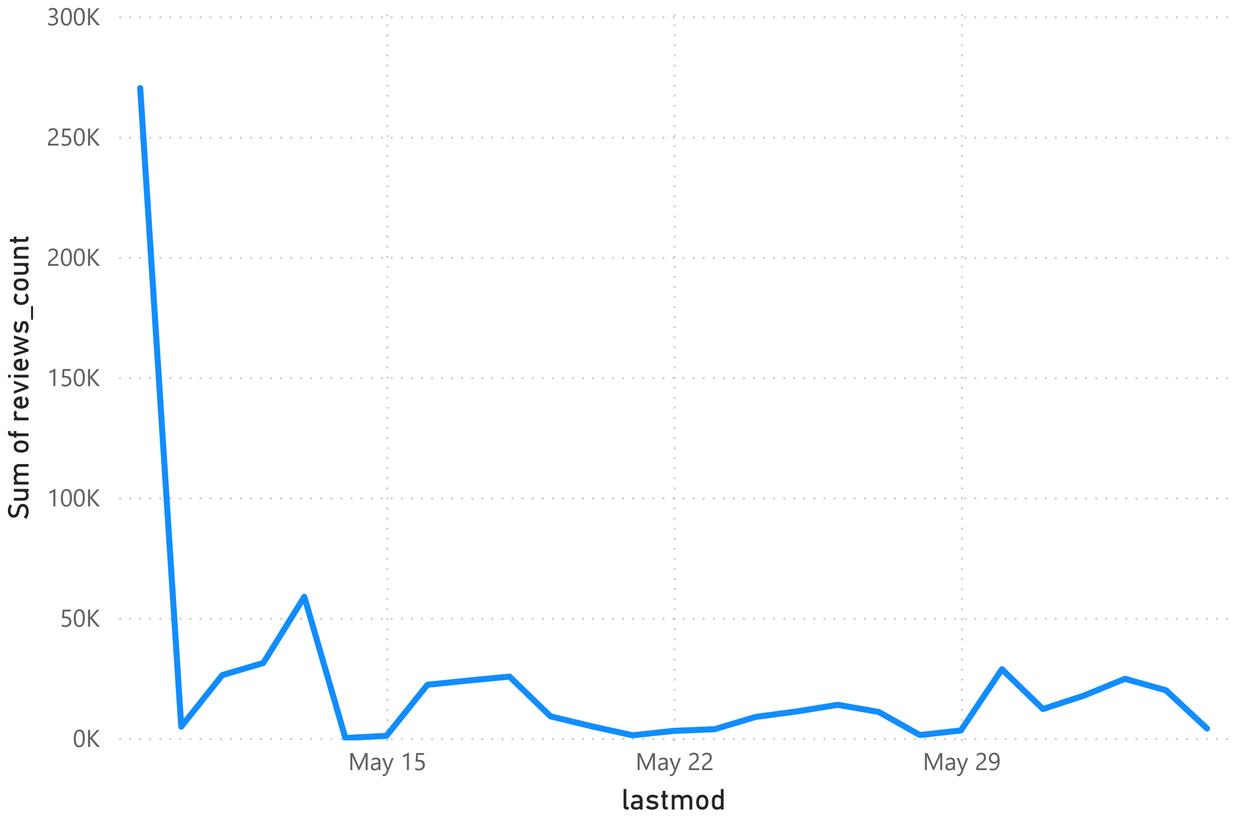
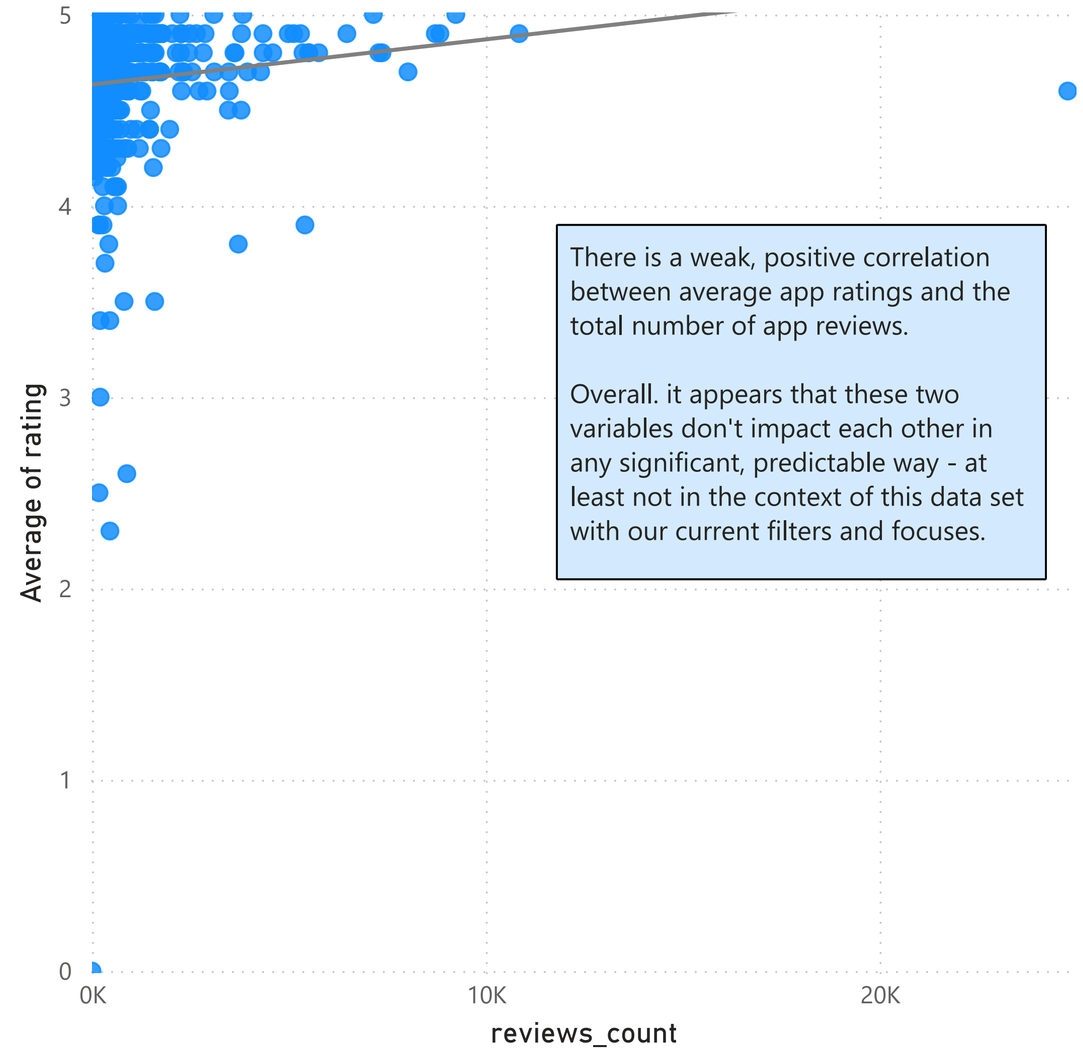
PART 1: APP LANDSCAPE

Number of Unique Shopify Apps 7.341K

Review Count vs Last Modified Date



Average App Rating vs Total Review Count



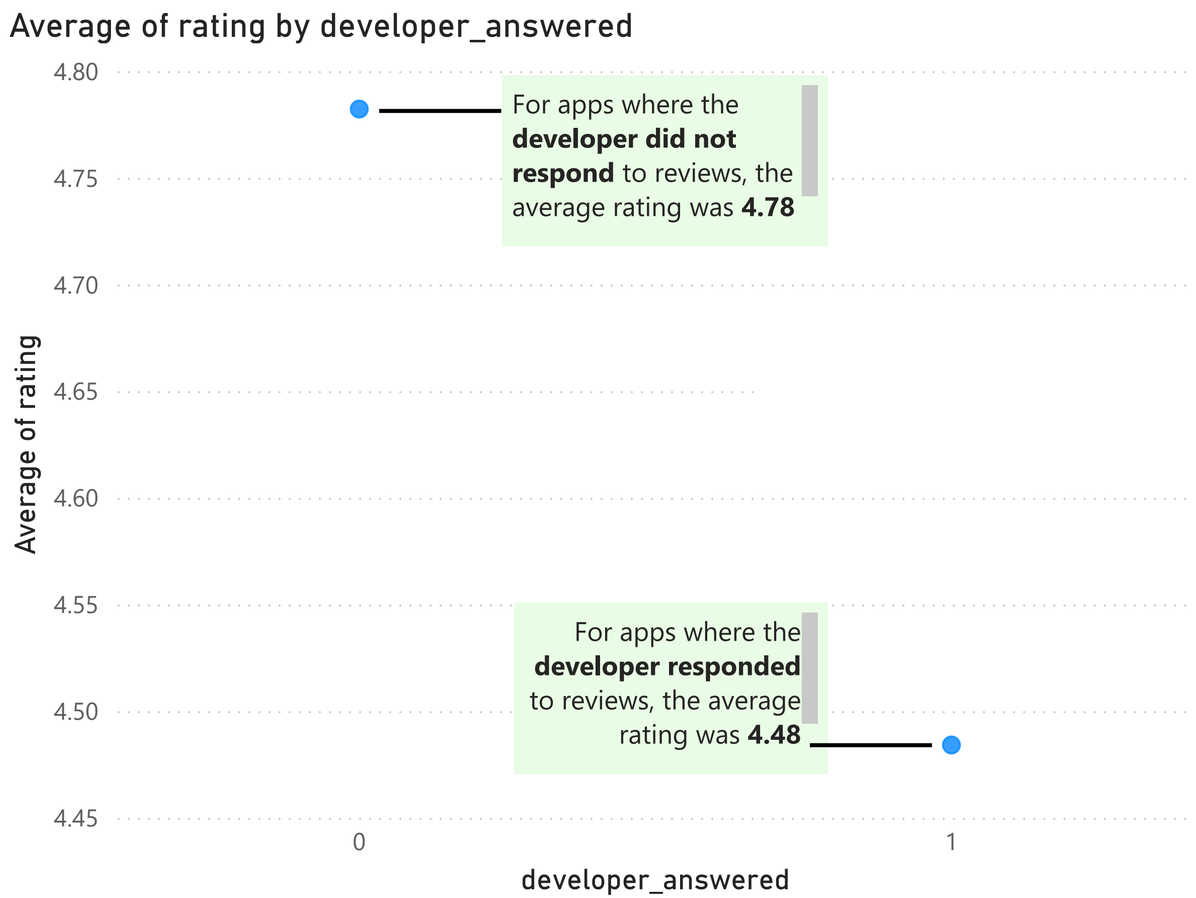
There is a weak, positive correlation between average app ratings and the total number of app reviews.

Overall. it appears that these two variables don't impact each other in any significant, predictable way - at least not in the context of this data set with our current filters and focuses.

PART 2: REVIEWS

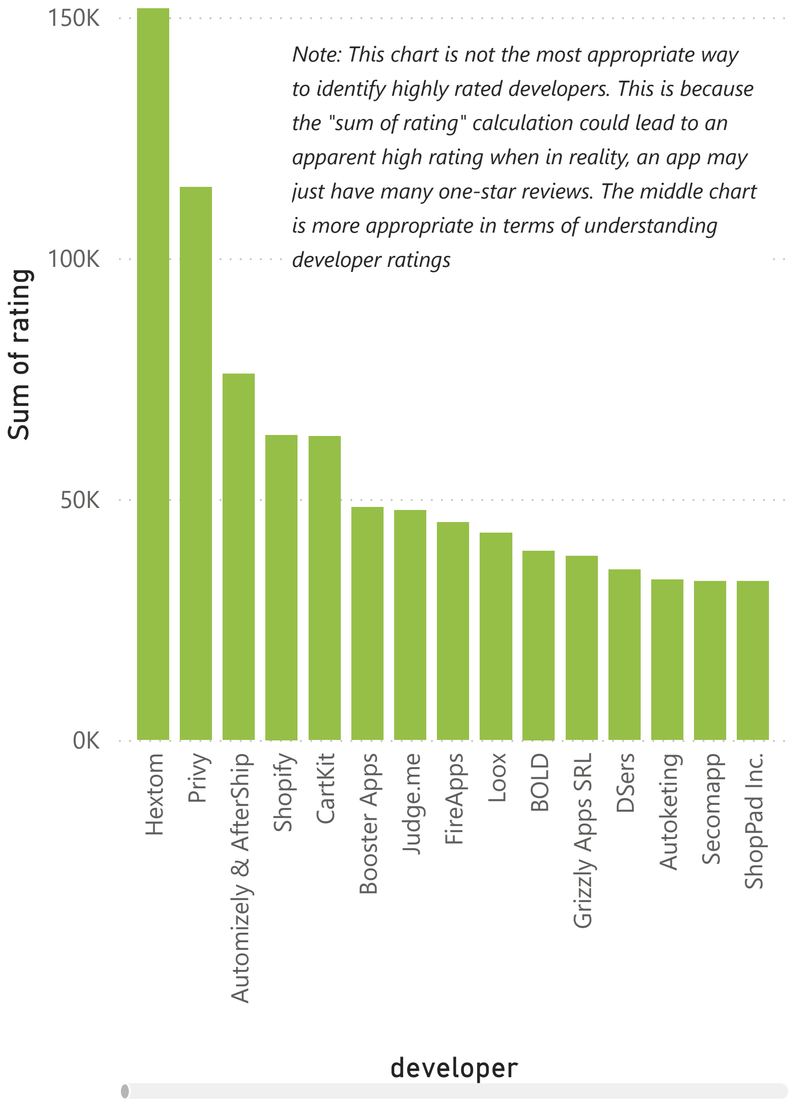
Average of helpful_reviews

5.48



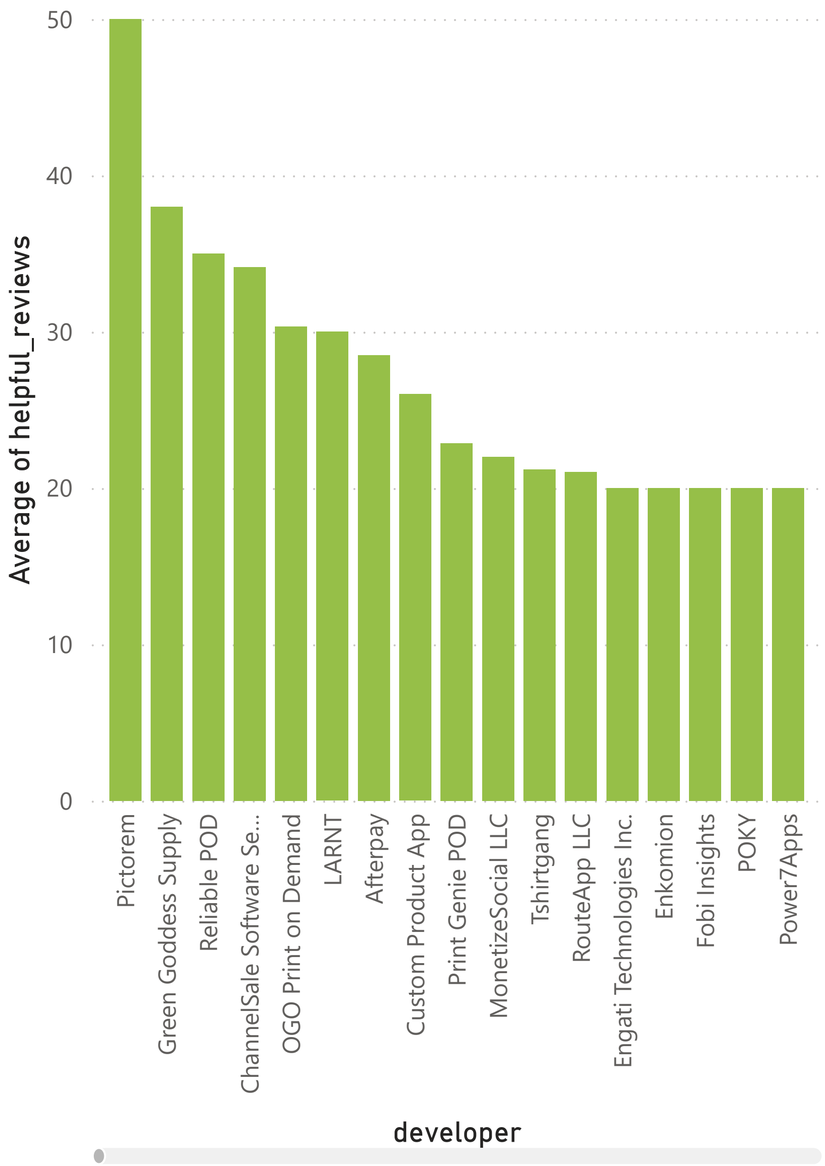
PART 3: DEVELOPERS & REVIEWS

Sum of rating by developer



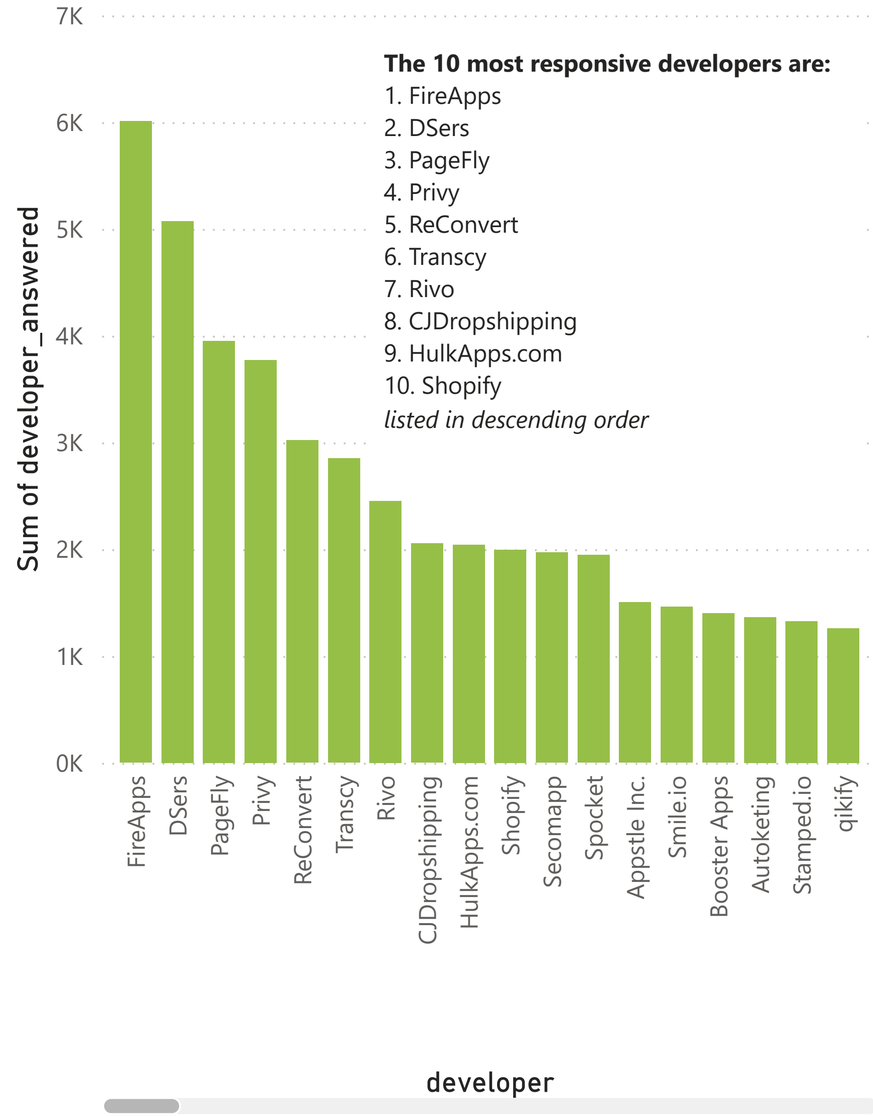
Note: This chart is not the most appropriate way to identify highly rated developers. This is because the "sum of rating" calculation could lead to an apparent high rating when in reality, an app may just have many one-star reviews. The middle chart is more appropriate in terms of understanding developer ratings

Average of helpful_reviews by developer



Sum of developer answered reviews vs developer

For review counts of > 500 only



The 10 most responsive developers are:

1. FireApps
2. DSers
3. PageFly
4. Privy
5. ReConvert
6. Transcy
7. Rivo
8. CJDropshipping
9. HulkApps.com
10. Shopify
